DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 50, 51 and 53 in the reply filed on 11/7/2005 is acknowledged. The newly added claims 54-56 have been added as being directed to the same invention.

Allowable Subject Matter

Claims 50, 51, and 53-56 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record while teaches the method of injecting fluid into a well for controlling a downhole valve means, the prior art of record however at least fails to teach or suggest the method of connecting a lower hydraulic conduit or capillary tube from a distal end of the well tool or valve means and deploying an upper hydraulic conduit through a production tubing immediately above the well tool or valve means to establish a fluid communication between the upper and the lower hydraulic conduits through the well tool or valve means so as to inject a fluid from a surface station to a downhole location below the well tool or valve means.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Goldschild et al, Pringle, Mullins and Leismer et al all teach methods of downhole injection and/or pressure monitoring.
